### 2<sup>nd</sup> Most Productive Implement

1. After the Spader, a Debris burying tiller– bed shaper is your most productive Implement.
2. Stones, woody stems, root balls and other vegetative debris are sunk below four inches of clean crumbled soil in a single pass.
3. During that same one pass soil is formed into a raised, shaped, firm bed ready for next crop.
4. With just 25 HP a 40” wide swath is cleaned and a 32” bed top is created. Your \$7,500 investment saves labor, growing season, fuel, reduces compaction and improves tilth.
