## Now! Small, High Quality, End Wheel Drive Grain Drills

This is a model PV 160, actual working width 62 inches, 5.6 inch row spacing with 11 rows.  
Price \$8,500—\$9,000 at US port.

ACMA Suprema drill with double disc openers

The PV 130 has a working width of 49 inches, 5.6 inch row spacing with 9 openers. Seed meters are designed to handle both small and large seed. Oil bath gearbox allows simple adjustment of planting density. Note: wheels are inside outermost opener on either side. Standard equipment includes spring tooth harrow to cover seed. Price \$8,000—\$8,500 at US port. Weighs 550 lbs.

Both models can be ordered with a separate hopper for fertilizer delivery with the seed at extra cost of \$1,535 per machine.

Price can be reduced \$900 if one uses "Falcioni" shovel type openers instead of double discs. In well tilled soil shovel openers work fine. In trashy conditions most people think double discs are the better choice.
