

Maximum Stability and minimal compaction through low center of gravity and 4 equal size drive wheels each carrying equal share of load. Horsepower's of 35 to 92.

Traction maximized by full time true 4 wheel drive and full oscillation of axles with appropriate ground speeds.

Unparalleled versatility. Driver module rotates 180 degrees allowing operator to face engine or 3 pt. facilitating forklift work, mowing and the like.

Precision steering control aided by unobstructed driver view and in case of articulated models rear wheels follow exact path of the front wheels.

Ferrari Tractor CIE (530) 846-6401 www.ferrari-tractors.com has sold tractors and appropriate implements and supplied parts throughout North America since 1987
