## New Custom made Greensharvester

This new 3 pt. mounted greens harvester cuts a 45" swath and conveys greens into totes carried on its rear platform. The salad greens or herbs are cut so cleanly that the product looks better and lasts longer than hand cut produce. Clean simple design is light but rigid and made of stainless steel. Even smaller tractors can operate this harvester effectively. The machine's band saw cutter and conveyor are powered with tractor hydraulics (3 gal. per minute approx.)

For an investment of \$15,000.<sup>00</sup> you get the means to harvest thousands of pounds of the highest quality produce per hour with a fraction of the labor costs be it cash wages or wear and tear on they farm operators.
