Produces Top  
Quality Olive Oil in  
compact portable  
plant. Process 330 to  
550 lbs of Olives per  
hour

Platform mounted 95  
inches front to rear and  
110 inches wide. Weigh-  
ing 3300 lbs with height  
of 75 inches. Powered  
by 14kw of electric cur-  
rent.

Conceived on the basis of the most up-to-date technology, MOLINETTO is a neat, compact plant, specially designed for those who want to make their own oil easily and cheaply. Made entirely in top-quality steel, the machine takes up a minimum amount of space and uses avant-garde techniques to ensure oil of the highest quality and excellent yields.

The MOLINETTO machine comprises: an olive loading hopper, a mechanical olive crusher, a malaxer with a hot water circulation jacket including an electrical element

to heat the water, a thermostat and recycling pump, as well as a centrifugal extractor for two-phase operations, an oil-collecting tank, a filter screen, an oil transferring pump, and a main control panel. The machine is supplied complete with platform and mono pump for discharging the husks. The plant is also fitted with a special continuous gravity separator that preserves all the organoleptic features of the oil. Made of glass, in the Tuscan tradition of the Florentine vase, the separator enable the machine operator to observe the natural water-oil separation process.
